

## MPC-Support channels MÜPROtect® type C320

### Field of application

- Ideal for pipe installation as support structure for air ducts as well as solar subconstructions
- Suitable for outdoor use

### Advantages

- 20 year guarantee against perforation corrosion and failure of the static load carrying capacity in the corrosion class C1–C3 according to DIN EN ISO 12944
- MÜPROtect® can be efficiently used for outdoor channel assembly, such as in solar projects
- Extensive documentation emphasizes the broad spectrum of applications
- Quick and efficient attachment of pipe sections and pipeways
- For secure fixing that is adjustable laterally and vertically
- High bending stiffness due to the good cross-section design
- Clean-cut appearance by the use of protection caps
